

LIVE ONLINE TRAINING/DEMO

Whether you wish to see a live demo of our liquid fuel cutting torch system, or would just simply like to brush up on the components and maintenance of your current Petrogen system, our Live Online Training/Demo resource makes it easier than ever to visually get the information you need.

TO PARTICIPATE:

1. First contact us at torch@petrogen.com or at 719-596-1175 to schedule a spot between Monday - Friday, 9 a.m. - 4 p.m. (Mountain time).
2. On the day of your scheduled training or demo, a Petrogen trainer will call ten minutes before your scheduled time to confirm your spot and ask you to visit the Petrogen website and click the Training tab. Or you may type the URL www.petrogen.com/training. Here you will see our live feed (requires high-speed Internet).
 - If you would like to allow multiple people to follow along in the training, call on a phone that has suitable speakerphone capabilities. We may also conference call separate lines at your request.
3. At the time of your scheduled spot, the Petrogen trainer will call back to initiate the live session, staying on the phone to verbally walk you and/or the group through the relevant material. All the while, an operator will be demonstrating the information on the live feed.

- All Petrogen online trainings are complimentary and do not require an account or login.
- Please let us know of any custom requests at the time of your scheduling so that we may be able to make the appropriate arrangements.
- Trainings and demos will generally last 35 - 45 minutes with additional time at the end for Q&A.
- At the conclusion of the training or demo, we do invite feedback to better the experience for future participants.
